Professional Summary

Detail-oriented BCA graduate and aspiring Data Analyst with hands-on expertise in SQL, Power BI, Advanced Excel, and Python (Pandas/NumPy) for data cleaning, exploratory data analysis, and business reporting. Experienced in transforming raw transactional datasets into interactive KPI dashboards, automating recurring reports, and writing optimized SQL queries to generate actionable insights for business decision-making.

Technical Skills

BI & Data Visualization: Power BI (DAX, Power Query, Data Modeling), Tableau, Advanced Excel (Pivot Tables, XLOOKUP, Charts)
Databases & SQL: SQL (MySQL, PostgreSQL), Complex Joins, Subqueries, CTEs, Window Functions, Aggregations
Data Analysis & Scripting: Python (Pandas, NumPy), Exploratory Data Analysis (EDA), Data Cleaning & Preprocessing
Tools & Platforms: GitHub, Jupyter Notebook, VS Code

Professional Training

Data Analytics <i>Solitaire Infosys, Mohali</i>	Completed
- Completed hands-on training focusing on end-to-end data analysis workflows: data extraction, cleaning, transformation, and visualization. - Performed exploratory data analysis on multiple real-world datasets to identify business trends, handle missing data, and remove outliers. - Wrote optimized SQL queries using multi-table JOINS, subqueries, and GROUP BY statements to prepare analytical data models. - Designed business dashboards in Power BI, Tableau, and Excel to monitor key performance indicators (KPIs) and operational metrics.	

Projects

E-Commerce Sales Analytics Dashboard <i>Power BI, MySQL, Excel, DAX</i>	2026	GitHub Repository
- Analyzed an e-commerce transactional dataset containing 3,000+ orders, 800 customers, and 150 products using MySQL and Excel. - Built a dynamic, multi-page Power BI dashboard tracking core metrics: Total Revenue, Profit Margin %, Average Order Value (AOV), and Total Orders. - Created custom DAX measures and calculated columns to establish dynamic time-intelligence reporting and filter invalid transactions. - Uncovered key trends—including a revenue peak of \$4.80M—and presented actionable product-mix insights to optimize sales strategy.		
Library Management & Database System <i>MySQL, SQL, Database Design</i>	2024 – 2025	GitHub Repository
- Designed and structured relational database tables in MySQL to track book inventory, user accounts, and borrowing records. - Wrote SQL queries using JOINS, aggregations, and conditions to manage book issue/return tracking and automate late-fee calculations. - Generated analytical reports and summaries to monitor book availability, user activity, and overdue patterns.		

Education

Bachelor of Computer Application (BCA) <i>Himachal Pradesh University (HPU)</i>	July 2022 – May 2025 CGPA: 7.58
12th Grade (Senior Secondary) <i>Govt. Senior Secondary School, Ramgarh Sikri</i>	2021 – 2022 88.2%

Certifications & Virtual Experience

[View Certificates](#)

Data Analytics Job Simulation <i>Deloitte (via Forage)</i>	June 2026
Completed practical tasks in forensic technology, data analysis, and business reporting.	
Data Analyst Job Simulation <i>One Roadmap</i> <i>Credential ID: ORA-DA-R5QDD7</i>	August 2026
Python Developer Certification (6-Month Course) <i>Coders Ready</i> <i>Credential ID: CR2024/PD/128</i>	October 2024
